BUSINESS AVIATION SOLUTIONS

AvPlan EFB is the leading Australian software company providing Electronic Flight Bag (EFB) technology solutions for devices. The EFB application is designed to go anywhere and can grow with your business.

AvPlan EFB encompasses a variety of features designed with both the pilot and back office in mind. It successfully delivers far beyond basic app and aeronautical chart services. AvPlan EFB understands the depth and breadth of delivering a complete solution to large organisations and the on-going support that is needed to enable organisations to maximise the benefits of the tools and services provided.

AvPlan EFB is the go-to product for a significant number of Australia's high profile aviation organisations including the Royal Flying Doctor Service, Queensland Government Air Wing, Sharp Airlines and numerous flight training organisations.

This is why...
